

Please do not allow Low Power FM (LPFM) to supercede current FM translator services. In particular, I very much want to continue to hear K-LOVE on my local radio at 91.1. K-LOVE provides uplifting and supportive music and encouraging words that are provided by no other station. If replaced, this would have a devastating effect on my community. K-LOVE is entirely user supported, so you know that it is popular and worth the effort since it has stayed on the air for so long in Colorado. It is because of this that I believe it is in the best interest for the public to keep it on the air and not let it be displaced by LPFM. Thank you for your consideration.
